

POWER GRID BANGLADESH PLC
Clarification No.01, Date October 27, 2025

Design, Supply, Installation, Testing & Commissioning of 132 kV Transmission Lines on turnkey basis (Package-5)
(OCB NO: POWERGRID/ADB/132kV TLS/PTSIREP/PACKAGE-5)

Pre-bid meeting was held on 5th October, 2025 as per clause 7.4 of Instruction to Bidders of Volume 1 of 3 of the Bidding document. Some queries were received from the prospective Bidders regarding the Bidding Documents. Clarifications on the above mentioned queries are given below, which will form part of the bidding documents.

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
1	Volume 1 of 3	ITB Clause 4.2, ITB Clause 5.1 & Section 5: Eligible countries	As the current project is funded by ADB, and ADB has specific eligibility criteria for suppliers, we would like to kindly confirm whether we will be considered eligible to supply under this contract.	Regarding the eligibility/ country of origin of a plant and service/subcontractor or supplier, the following ITB Clauses are mentioned in the Bidding Document (volume 1 of 3). a) ITB Clause 5.1- "The plant and services to be supplied under the Contract shall have their origin in eligible source countries as defined in ITB 4.2 and all expenditures under the Contract will be limited to such plant and services." b) ITB Clause 4.2- "A Bidder, and all partners constituting the Bidder, shall have the nationality of an eligible country, in accordance with Section 5 (Eligible Countries). A Bidder shall be deemed to have the nationality of a country if the Bidder is a citizen or is constituted, incorporated, or registered, and operates in conformity with the provisions of the laws of that country. This criterion shall also apply to the determination of the	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
				nationality of proposed subcontractors or suppliers for any part of the Contract including related services." As per Section 5 :Eligible Countries of the Bidding Document (volume 1 of 3)- "Eligible countries are limited to all ADB members listed at www.adb.org/about/members, other than any restrictions arising from ITB 4.8." Therefore, the prospective Bidder/Supplier is requested to check their eligibility to participate under this tender against the above mentioned clauses and section of the Bidding Document.	
2	Volume 1 of 3	Section 4: Bidding Forms/Price Schedule	SECTION H: Reconductoring of Shahjibazar-Brahmanbaria-Ashuganj double circuit 132kV transmission line, for this line our understanding is to change the whole set fittings with insulator for ACCC type conductor are in scope, please confirm	Please follow the Bidding Document	N
3	Volume 1 of 3	Section 4: Bidding Forms/Price Schedule	In the price schedule format the payment for compensation is mentioned as "Payment for Compensation (For resettlement of affected people, dwelling/commercial structures, trees, crops etc. on the Right of Way)" where the terms "Compensation" and "Resettlement" conflicts with each other. We understand that, during construction stage we will pay only the damage compensation for crops, trees, houses, etc. according to section 18.3 of volume 2 of 3, please confirm. Will there be any committee for the payment of compensation/resettlement? We understand the price that will be quoted as a lot in the tender will be evaluated and will be payable in no condition since all landowner	As per the provisions in the electricity rules, 2020 (Amendment 2022), during the tower footing construction period, no compensation will be paid for the resettlement of the Project-Affected Persons (PAPs). Only the permanent and temporary loss of crops, standing trees, and commercial trees due to tower construction area will be compensated. The rate will be collected in consultation with BADC, and the Property Assessment and Valuation Committee (PAVC) (Reference to RP: 10.4.1) will determine the compensation amount. After the compensation amount is determined, the contractor will pay it to the PAPs and submit all evidential documents to the power grid;	N

			will be compensated for the damage for crops, trees and houses if any according to the government rate chart of those particulars.	subsequently, the power grid will reimburse the contractor for the compensated amount.	
4	Volume 1 of 3	Section 4: Bidding Forms/Price Schedule	We understand that the T-clamp fittings directly connected to the ACCC conductor must be supplied by a CTC authorized manufacturer. Please confirm whether other substation fittings may be sourced from any alternative fittings manufacturer.	All ACCC Conductor Fittings shall be supplied from CTC authorized Manufacturer	N
5	Volume 1 of 3	Section 4: Bidding Forms/Price Schedule	The scope described for conductor supply and stringing does not align with the provisions of SECTION D: LILO of Chowmuhani–Ramganj 132kV double circuit transmission line at Chatkhil Substation work. Please clarify.	Please refer to Addendum-1	Y

For Submitter  *For Submitter*  

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
6	Volume 1 of 3	Section 4: Bidding Forms/Price Schedule	All fittings/accessories required for completing the termination of the transmission line in each of the mentioned below 132kV substations from substation gantry up to. each 132kV Bus or GIL Bushing (SF6 to Air Bushing) or Outdoor Cable Sealing End via each existing equipment In the relevant two (2) bays/circuits (each at Ashuganj and Shahjibazar Substation) or four(4) bays/circuits (at Brahmanbaria Substation). Existing phase conductor (single conductor per phase) as jumper/loop/drop-in/drop-out conductor etc. along with its connecting fittings/accessories (i.e. the fittings/accessories which connect the phase conductor with the bay equipment viz LA, CT/PT, ES, DS , CB, Busbar conductor,GIL Bushing (SF6 to Air Bushing) or Outdoor Cable Sealing End etc.) in the relevant two (2) bays of Ashuganj and Shahjibazar Substation) or four(4) bays of Brahmanbaria Substation to be replaced with new phase conductor twin ACSR Grosbeak per phase and new connecting fittings/accessories suitable for twin ACSR Grosbeak. All the fittings/accessories to be of such design & material that they can continuously conduct without raising the temperature above allowable limit of the substation equipment the current that is two times the maximum continuous operating current of ACSR Grosbeak at prevailing conditions. The connector (T-pad/ T-connector or any other kind fitting as appropriate) required nearby the gantry for	The contractor has to find out the specification and quantity from site during execution. The contractor can visit the relevant Substations and measure the quantity of hardware fittings. However, the quantity will be finalized during execution.	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			making connectivity between the line phase conductor ACCC (terminated at the gantry) and the relevant bay phase conductor (twin ACSR Grosbeak per phase) to be of such design & material that the temperature of the ACSR Grosbeak will not exceed the limit as mentioned above while maximum continuous operating current (two times the maximum continuous current of ACSR Grosbeak) flowing through the circuit (supply of phase conductor ACSR Grosbeak is not included in this item). Kindly provide the appropriate drawings along with quantity of hardware fittings/accessories required for substation termination works, which are essential for this tender.		
7	Volume 1 of 3	Section 8, Special Conditions of Contract, Clause 8: Time for Commencement and Completion	According to the new electricity act the land devaluation needs to be paid to the affected landowners before starting the construction of tower foundation. The effective time of the contract will be counted from the date of land value payment and the land value will be paid by Power Grid? Please clarify.	Please follow the Bidding Document.	N
8	Volume 1 of 3	Section 4: Bidding Forms	Affiliate Company Guarantee format is not available in the tender documents. Please provide.	As per ITB 35.2 -'The qualifications of other firms such as the Bidder's subsidiaries, parent entities, or affiliates, "shall not" be permitted.' Therefore, affiliate company guarantee is not applicable in this tender.	N

Handwritten signatures and initials.

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)												
9	Volume 1 of 3	Section 4: Bidding Forms, Form FIN - 1: Historical Financial Performance	We understand that the tender requires submission of complete historical financial statements, including all notes. However, the inclusion of all notes will make the document extremely lengthy (around 80 pages) and require extensive translation work. Please confirm whether it would be acceptable to submit only the main financial statements (balance sheet, income statement, and cash flow statement) without the detailed notes?	Bidders have to submit complete historical financial statements, including all notes as per bid requirement.	N												
10	Volume 1 of 3	Section 4: Price Schedule/ 1.1 of Schedule No.1H	Please clarify what "Fabricated" specifically refers to, such as steel plates or angle irons. <table><tr><td>1</td><td>Galvanized tower steel</td><td></td><td></td><td></td></tr><tr><td>1.1</td><td>Fabricated</td><td></td><td>ton</td><td>\$</td></tr></table>	1	Galvanized tower steel				1.1	Fabricated		ton	\$	Steel Plates, Angles etc. which are Fabricated according to the design drawing supplied by the End User, are included in the term "Fabricated"	N

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
17	Volume 1 of 3	Section 7:GCC, Clause No. 14 - Taxes & Duties & Section 8:Special Conditions of Contract	It is clearly stated that: <i>"Any material imported from abroad under Price Schedule No. 1 shall be considered as the direct import of the Power Grid, and Power Grid's Business Identification Number (BIN) will be used for the import. Power Grid shall bear and promptly pay all relevant customs and import duties as well as other local taxes, e.g., Value Added Tax (VAT), Advance Income Tax (AIT), and other charges imposed by the laws of the country, that are to be incorporated into the facilities. Accordingly, the items under Price Schedule No. 1 shall be quoted exclusive of customs duties, VAT, AIT, and other relevant duties and taxes."</i> However, the applicability of taxes and duties for the items covered under Schedules No. 2, 3, and 4 has not been clearly defined. We therefore kindly request clarification on the following points: 1. Price Inclusion of Taxes for Schedule No. 2, 3, and 4 Should the contractor include the applicable VAT, AIT, and other local taxes and duties in the quoted prices for items under Schedule No. 2, 3, and 4?	Bidders are requested to go through SCC sub-clause 14.1 and 14.2 of the Bidding Document.	N

20	Volume 1 of 3	Section 9 :Contract Forms, Terms of payment	As per the bidding documents, under section (B) Payment Procedures, it is stated that: <i>"All foreign currency payments will be made through an irrevocable commercial Letter of Credit (LC), except for the advance payment, which will be paid via direct disbursement by Power Grid without the LC. The advance payment shall be 10% of the foreign currency portion, while the remaining 90% will be paid through an irrevocable commercial LC. Furthermore, the LC value will be temporarily increased to 100% of the contract value only for customs clearance purposes at the port."</i> Based on the above, we understand that: all foreign currency payments (except the advance payment) shall be made exclusively through an irrevocable commercial Letter of Credit. We kindly request you to confirm whether this interpretation is correct, particularly that 90% of the foreign currency portion will be paid via LC, and the LC will be irrevocable and commercial in nature. This confirmation is essential for our financial planning and coordination with banking institutions.	Only the advance payment (10% of the foreign currency portion) will be paid through direct disbursement by Power Grid, without letter of credit. The remaining payments (90% of the foreign currency portion) will be made through an irrevocable commercial Letter of Credit. Also, refer to ITB Clause 19.1 and 19.2 for currencies of Bid and payment.	N
21	Volume 1 of 3	Section-1: Instructions to Bidders, Clause 21- Bid Security	In reference to ITB Clause No. 21 and the corresponding provisions in the Bid Data Sheet (BDS), we understand that a Bank Guarantee issued by a reputable bank from an eligible country is acceptable for bid security purposes.	A Bank Guarantee, as a Bid Security, issued by a reputable bank in an eligible country does not require a counter-guarantee from a scheduled bank in Bangladesh.	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			We kindly request your confirmation on the following point: Will a Bank Guarantee issued by a reputable bank in an eligible country require a counter-guarantee from a scheduled bank in Bangladesh, or will it be accepted as-is?		
22	Volume 1 of 3	Section -3 , Evaluation & Qualification Criteria, 1.3.7 Domestic Preference	As per the bidding documents, it is stated that: "In the comparison of Bids, only the CIP price component of each Bid for the Plant and Equipment offered from outside the Employer's country shall be increased by 15%." We kindly request clarification on the following: • Will the 15% price adjustment be calculated only on the quoted CIP price, or • on the CIP price including applicable Customs Duties, VAT, and AIT?	For comparison of Bids, 15% price adjustment be calculated only on the 'CIP price after arithmetic correction and applicable discount' excluding customs duties, VAT and AIT .	N

Sl No.	Volume	Section/Cause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
23	Volume 1 of 3	Section 2: Bid Data Sheet, ITB 19.1	Pursuant to the clause mentioned in the Bid Data Sheet, ITB 19.1(a) "The prices shall be quoted either in the currency of the Bidder's home country, or in any fully convertible currency". We would like to request you to clarify the following points to ensure compliance with the bidding requirements: 1. Definition of Fully Convertible Currency: Could you please confirm whether Chinese Renminbi (RMB/CNY) is considered a fully convertible currency under this procurement for bid submission purposes? 2. Preferred Currency for Evaluation: If RMB is allowed, will PGCB / the Employer apply any specific exchange rate for bid evaluation, or should the bidder provide the USD equivalent in the submission? 3. Number of currencies can be quoted: Kindly confirm the number of currencies that bidders are allowed to use for quoting the contract price.	1. The Renminbi/Chinese Yuan(CNH) is a fully convertible currency. 2. As per ITB 37.1- The currency that shall be used for bid evaluation and comparison purposes to convert all bid prices expressed in various currencies into a single currency is: Bangladesh Taka (BDT). The source of the selling exchange rate shall be: For USD to BDT conversion- Current Weighted Average Rate (WAR) of interbank exchange rate published by Bangladesh Bank. For other currencies conversion to BDT - Selling cross rate(s) published by Bangladesh Bank. The date for the selling exchange rate shall be: Date of the Technical Bid Opening. 3. There is no restriction on number of currencies of Bid. However, it is preferable that maximum number of currencies of Bid should be 04 nos.	N

			b. Also, the QR Specifies that Minimum 3 Contracts must be successfully completed while the cumulative value upto Four contract must be at least 35 Mn USD. To our understanding the fourth contract also must be a Successfully completed contract and no substantial completion of the fourth contract shall be admissible for evaluation of Qualification requirement compliance. Pls clarify.		
31	Volume 1 of 3	Section 4: Price Schedule/Foot Note-4 of Sch-1 of each line	Here it is mentioned that All sections, considered here is for one single project. If an item (along with unit price) is not available in a section but available in another section of this contract; during execution, if such item (along with unit price) is needed to be used in the section where item is not available then such item (along with unit price) can be used in the section where it is not available. If the same exists in more than one item lowest unit price among them will be considered. We have the following clarification in this regard a. The above clause is applicable only when any item is required to be exercised in a particular section but in the given price schedule for that section, that particular item does not exist. In such case, other section price schedule shall be referred and as per above clause the unit price shall be exercised for executing the item In	Confirmed. Please follow Addendum-1.	Y

			subject section. Pls confirm if the understanding is correct.		
32	Volume 1 of 3	Section 4: Price Schedule/Payment for compensation	In All the price Schedule of Various Lines Sch-4 has specified the following line item Payment for Compensation(For resettlement of affected people, dwelling/commercial structures, trees, crops etc. on the Right of Way and preparation of a sketch map for tower footing compensation as per employers requirement) & And Unit & Quantities are specified as LS and 1. We have the following clarification in this regard a. As a general practice PGCB used to have the provisional sum for ROW Compensation as it is extremely challenging to assess the same at the bidding stage. However going through the above price item it appears that complete Risk of RoW has been passed on to the bidder. Is it the bidder's responsibility to settle all ROW Issues ? Pls Clarify	a. Please follow the Bidding Document. b. Only the permanent and temporary loss of crops, standing trees, and commercial trees due to tower construction area will be compensated. As per the RP, if any permanent structure is found within the ROW, efforts shall first be made to avoid it. However, if avoidance is not possible, the contractor shall compensate the affected person (PAP) based on the decision of the PIU. Upon submission of all evidential documents related to the compensation, Power Grid will reimburse the amount to the contractor. c. Please follow the Bidding Document. d. The Compensation Form must include the following details (not limited to): Category of Compensation period (Pile/Pile Cap/Tower Erection/Stringing/Row Clearance), Tower Point/Approach Road, Line Name, Tower No., District, Upazila, Mouza, Khatian and Dag No., Affected Crops/Tress name, Quantity (nos/area in	N

Sl No.	Volume	Section/Cause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
				compensation to the power grid; subsequently, the power grid will reimburse the contractor for the compensated amount. For tower footing land compensation, the contractor will prepare a sketch map as per the tower footing locations and information collected from the landowner, then the safeguard implementation consultant will prepare the compensation amount for tower footing area. Subsequently, the power grid will deposit the amount to the District Commissioner's (DC) bank account, and then the DC will disburse the amount to the landowner. f. The compensation is to be released as and when required in the interest of the project execution. g. Please follow the Bidding Document.	
33	Volume 2 of 3	Section 6, Annex 6-2: Geotechnical Investigation	In this section the frequency of geotechnical investigation is mentioned as like below: Level 2 Every tower site excluding river crossing and anchor towers and rigid frame tower. Level 4 At river crossing, anchor towers and rigid frame tower. According to the above our line tower foundations geotechnical investigation will be considered as "Level 2". In the price schedule it is mentioned that Level 3 is included in the foundation price. Please clarify that our understanding of quoting price at Level 2 is applicable for all towers and payment will be done accordingly?	Please refer to the Addendum -1	Y

SI No.	Volume	Section/Cause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
34	Volume 2 of 3	Scope of Works, 10. Insulator and Conductor Fittings, 11. Conductors	From the tender documents, we found the specification and GTP for the ACSR Grosbeak Conductor and only the GTP for the ACCC Grosbeak Conductor. We could not locate the specification for the ACCC type. Kindly confirm the string set for the conductor will be the same for both ACSR and ACCC types.	Please refer to Addendum-1	Y
35	Volume 2 of 3	Scope of Works, 10. Insulator and Conductor Fittings, 11. Conductors	Is it required to perform the type test combined with the offered insulator and fittings? If the type test was completed earlier, would a minor design change during the design stage require it to be repeated at the execution stage?	Please follow the Bidding Document.	N
36	Volume 2 of 3	Section 23: Reference Data	Within the bid document, we have received the coordinates and maps of the tower locations. To facilitate the preparation of our proposal more accurately and efficiently, we would be highly grateful if you could kindly provide us with the KML/KMZ of the transmission line route map.	The kmz files of the transmission lines are provided to the prospective bidders who have purchased the bidding document.	N
37	Volume 2 of 3	Annex 1-1 Reconductoring of Shahjibazar-Brahmanbari-a-Ashuganj	After the reconductoring, can the tower withstand the tension? Has the tower strength been calculated? In addition, can the current foundation meet the requirements after the reconductoring? If the calculation fails, what should be done?	The contractor has to match the sag and tension during reconductoring so that the tension lies within the existing tension limit. All types of precautions has to be taken by the Contractor during the work.	N

Sl No.	Volume	Section/Cause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
		132kV transmission line			
38	Volume 2 of 3	Annex 1-1 Reconductor ing of Shahjibazar-Brahmanbari a-Ashuganj 132kV transmission line	If the electrical clearance is not enough after reconductor, should the ROW be cleaned , such as demolishing excessively tall buildings? If so, will this be the responsibility of the PGB or the contractor?	Please follow the Bidding Document.	N
39	Volume 2 of 3	Annex 1-1 Reconductor ing of Shahjibazar-Brahmanbari a-Ashuganj 132kV transmission line	If the ROW will not be cleaned, the tower height needs to be increased or change the line route to meet the electrical clearance. How should the settlement be made if this happens?	Please follow the Bidding Document.	N
40	Volume 2 of 3	Annex 9-2 Electrical & Mechanical Characteristics	The insulator parameters shown here are for ACSR Grosbeak conductors only. Do they also apply to ACCC Grosbeak conductors?	Please refer to Addendum-1	Y

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
41	Volume 2 of 3	/	Please provide the tower drawings and foundation forces corresponding to the 8 sections of the transmission lines for this project.	Please follow the Bidding Document.	N
42	Volume 2 of 3	Annex 1-1 Power Grid Bangladesh's existing design shall be used for all other towers to be used in the lines.	Please provide the design drawings of all steel towers for each transmission line, as bidders need to prepare quotations based on parameters such as tower weight. Since the meteorological conditions vary for each line, the tendering party is requested to provide detailed steel tower drawings and parameters separately for each line.	Please follow the Bidding Document.	N
43	Volume 2 of 3	Annex 1-1 However, if the Contractor needs to prepare any additional structural and shop drawings or make any correction of existing drawings, these have to be	Please specify, for each transmission line, which tower types are provided by the owner and which tower types require the contractor to conduct supplementary additional design or redesign? For the steel towers that the contractor carries out supplementary design or redesign on, is it necessary to perform destructive tests?	Please follow the Bidding Document.	N

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
		prepared by the Contractor without any additional cost. In such case, the Contractor has to submit relevant documents/drawings for approval of the Employer.			
44	Volume 2 of 3	6.6 Test Level	For the Level 2, level 3 and level 4 are almost the same geotechnical investigation requirements, which all based on in-situ testing and laboratory test. The in-situ testing is the same for all three levels. The laboratory tests are almost the same for three levels, with only small difference: For the Level 3, it just add laboratory vane shear test instead the direct shear box test in Level 2. For the Level 4, it just add the triaxial compression(undrained) test compared to Level 3. The differences are minimal for these three levels.	Your Understanding is correct.	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			For different level, does it mean the Levels indicate the degree of detail, with Level 4 being the most detailed, followed by Level 3, then Level 2?		
45	Volume 2 of 3	Section 6 - Geotechnical Investigation, Clause 6.7 Geotechnical Investigation Report	We have recently conducted site visits to the following transmission line sections: Kachua–Matlab North 132kV Double Circuit Line Satkhira–Paikgacha 132kV Double Circuit Transmission Line Bhandaria–Mathbaria 132kV Double Circuit Transmission Line During our visits, we observed that several areas along the proposed alignments are characterized by significant waterlogging and marshy terrain. Based on these field observations, we believe that the soil classification provided in the bidding documents may not accurately reflect the actual ground conditions. In this context, we respectfully request the following: Provision of any available preliminary soil investigation reports for the above-mentioned line sections; or Permission to conduct limited pre-bid soil investigations at selected tower locations to better assess the geotechnical conditions and ensure accurate cost and design estimations.	Bidders may perform soil investigation to assess soil/ground condition at their own discretion.	N

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
46	Volume 2 of 3	Section 23 - Reference Data, Clause 23.1 Line Route Data	We have reviewed the coordinates provided in Annex 23-1 of the bidding documents. Upon field verification, we found that many of the listed coordinates are inaccurate and deviate significantly from the actual project requirements. In order to prepare a comprehensive and sustainable bid, it is essential to assess the true ground conditions and line alignment with respect to: Route accessibility Terrain and topographical constraints • Right-of-way (ROW) and clearance issues • Tree cutting and vegetation management and classification (e.g., waterlogged or marshy areas) During our site visits to the project locations, we observed that a large portion of the proposed alignment passes through waterlogged and marshy areas, which would require substantial effort in terms of access road development and route clearance. Given the critical importance of accurate data for technical and commercial planning, we you to provide the corrected and updated line route coordinates in a standard geospatial format (.KMZ or equivalent).	Please refer to the UTM Coordinate mentioned in the bidding document drawing	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
47	Volume 2 of 3	Section 1 - Scope of Works, Annex 1-1: Scope and Extent of Definite Works	As per the Scope of Works outlined in the bidding documents, particularly under the LILO line sections listed below: (iv) LILO of Chowmuhani–Ramganj 132kV D/C line at Chatkhil Substation (approx. 2 km) (v) LILO of Shahjibazar–Brahmanbaria 132kV D/C line at Madhabpur Substation (approx. 1.2 km) (vi) LILO of Bogura(S)–Naogaon 132kV D/C line at Dupchanchia Substation (approx. 2.5 km) (vii) LILO of Bheramara–Rajbari 132kV line at Kumarkhali Substation (approx. 0.6 km) It is mentioned that each LILO shall involve: Installation of new line sections using ACSR or ACCC Grosbeak conductor, Use of galvanized steel earthwire equivalent OPGW, and Dismantling and bypass of the existing transmission line near the LILO location. Upon reviewing Annex 23-1, we understand that the proposed new towers for the LILO sections are to be erected along the route of the existing transmission lines, and the existing towers will be dismantled after successful diversion and connection of the LILO sections to the substation gantries. We kindly request you to confirm whether this interpretation is correct, specifically regarding:	Cofirmed.	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			- Whether existing towers in the LILO sections are to be dismantled post-commissioning of the new LILO connection. - Whether new tower locations overlap or run adjacent to the current alignment, requiring partial realignment or bypass.		
48	Volume 2 of 3	Section 9 - Insulators	We have reviewed the bidding documents and noted that the Electrical and Mechanical Characteristics for insulators are provided in Annex 9-2, but these are specified only for use with ACSR Grosbeak conductor. As the scope of the project also includes the use of: ACCC Grosbeak conductor, and ACCC Hawk conductor, we kindly request you to provide the corresponding Electrical and Mechanical Characteristics for both ACCC Grosbeak and ACCC Hawk conductors. This information is essential for: - Insulator and hardware selection, - Tower loading and stringing calculations, and - Overall system design and bid preparation.	Please refer to Addendum-1	Y
49	Volume 2 of 3	7x3.25 GS Earthwire	Technical specification & Technical data Sheet for 7x3.25 GS Earthwire are not provided in bidding documents. Please provide.	Please refer to Annex 11-5(1) of Vol. 2 of the bidding document.	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
50	Volume 2 of 3	Factory Acceptance Test	Please confirm whether Factory Acceptance Tests (FAT) are to be witnessed by the Employer/Engineer's personnel. If yes, kindly clarify: · Who will bear the cost of air tickets, lodging, boarding, and local transportation? · How many personnel will be deputed to witness each FAT? · Minimum days required for each FAT	Please follow the Bidding Document.	N
51	Volume 2 of 3	Annexure 23-2	Upon review of the bid documents, we have noted that in the Map of Satkhira–Paikgacha 132kV Double Circuit Transmission Line (Section A), the tower location maps for AP No. 6 to AP No. 10 are missing. Additionally, the drawing provided in Annexure 23-2 (Page 23-69) appears to be identical to the one in Annexure 23-2 (Page 23-64). In view of the above, we kindly request you to clarify the issue and provide the maps of the missing AP tower locations at your earliest convenience.	Please refer to Addendum-1	Y

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
52	Volume 2 of 3	Volume 2 - Employer's Requirement, Section 5 - Access	With reference to Section 5 – Access, particularly Annex 5-1: Route Clearance, we seek your kind clarification on the following points to ensure proper understanding and compliance during execution: Right of Way (ROW) Status: Kindly confirm whether Power Grid has already acquired the right of way (ROW) and/or the rights of tree felling and vegetation clearance along the transmission line corridor as defined (14 m for 132 kV, 20 m for 230 kV, and 23 m for 400 kV on either side of the centerline). Access Tracks in Fisheries Zones: As major portion of the transmission line route passes through fisheries and waterlogged zones, please clarify whether it is feasible and sustainable to construct and maintain 3.5 m wide access tracks from public roads to lower locations in such areas, or whether alternative access methods (e.g., temporary pontoons, floating platforms, or boat access) may be considered acceptable. Compensation for Tree Cutting: The clause specifies clearance of trees and vegetation; however, it is not clear who will be responsible for compensating the landowners for felled trees or affected vegetation. Kindly confirm whether such compensation shall be handled by the Employer/Power Grid or the Contractor.	Please follow the Bidding Document.	N

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			Access in Restricted/Fisheries Areas: Considering that major tower locations are within fisheries or privately operated zones, the Contractor may face difficulties or resistance in gaining physical access. We request guidance on the mechanism to obtain smooth access, including whether Power Grid or local administration will facilitate necessary coordination and permissions from local landowners and fisheries cooperatives.		
53	Volume 2 of 3	Annex 1-1: Scope and Extent of Definite Works	As per the Scope of Works defined in the Bidding Documents, it is stated that: "Dismantling of existing tower, conductors, OPGW, EW with associated hardware fittings. The dismantled conductors, OPGW, GW shall be re-rolled on metallic drums and handed over to Power Grid by the Contractor for auction. The dismantled hardware fittings shall be handed over to the relevant GMD offices in separate wooden boxes. The dismantled tower members shall be bundled and handed over to the relevant GMD offices. The necessary transportation and any other works required shall be deemed to be included." In this regard, we seek clarification on the following: Please confirm whether the Contractor shall be permitted to use the empty drums of newly supplied	The contractor may use the empty drums of newly supplied conductor, earthwire and OPGW, only if the drums are applicable for dismantled conductor, earthwire & OPGW and fulfill the requirements of the contract document, upon the approval by Power Grid Bangladesh during execution stage. However, any additional drums required for re-drumming shall be supplied by the contractor without any additional cost.	N

[Handwritten signatures and initials]

Sl No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			conductor, ground wire (GW), and OPGW for re-rolling the dismantled materials to be handed over to Power Grid, or if separate drums shall be arranged exclusively for this purpose.		
54	Volume 2 of 3	Annex 1-1 Scope of Works	Here the contract scope is primarily construction of 3 New Lines, 4 LILO Lines and 1 Reconductoring. We have the following clarifications in this regards a. Since LILO Lines are integral part of the contract and are expected to be delivered within the Stipulated project time lines, hence whether the LILO Position (Entry and Exit Points of Lines for which LILO is to be done) and the corresponding Substation Locations to where this LILO's will be done are identified or Not. Pls Confirm. b. In case the answer to the above query is no, then what's the time line envisaged to have clarity on this aspect	Route Maps of all the LILO lines are included in the Bid Document, where the starting point and end points are shown. However, the locations shall be finalized during execution stage. The required time for the execution of mentioned work has already been considered in the time schedule of this project.	N
55	Volume 2 of 3	Clause 18.1.11 Test of Major Items for Quality Control	In this clause the major items are defined for which FAT/TT is required to be done before dispatch of the material. However, there is no clarity on the Witnessing of the test by the employer. Whether the Logistic cost of the Employer's Engineers witnessing the subject test including their Dearness Allowance and Number of Days are not clearly defined.	Please follow the Clause no. 23: Test and Inspection of Section 7: General Conditions of Contract, Volume 1 of 3 of the Bid Document.	N

SI No.	Volume	Section/Clause No.	Bidder's Query	Reply from Power Grid	Addendum Yes(Y)/No(N)
			If it is to be borne by the contractor, then please clarify the same in terms of No of Days, Number of Engineers, Class of Travel and Dearness Allowance per day etc.		
56	Volume 2 of 3	Annex 3-5 Field Quality Plan	For Cube Testing, the sampling rate is defined as "One sample of 4 cubes in each tower locations or per 6 cum concreting per day work" & For pile one set for each leg. For pile caps, beams, chimney, one sample for every 6 m³ or part thereof for each day of concreting. To our understanding the number of cubes to be taken for each tower for piling shall be minimum 16 which is significantly high and it becomes difficult to handle these cube logistically for so many towers. It is hereby requested to kindly review the same and clarify what are the maximum number of cubes to be taken per tower for pile & pile cap. Pls clarify.	Please follow the Bidding Document.	N
